Women of IxD*

including HCI, research, interface design (UI), information architecture (IA), interaction design (IXD) and other subdisciplines

Erin Malone. // Experience Matters Design // June 2021

*not all women

CAVEATS & KNOWN ISSUES:
 This diagram shows a small subset of the influence and work women have been doing across the Interaction Design and User Experience Design landscape since the beginning.
 The model has a deficit in showcasing the work of BIPOC women as their stories are harder to find or are not existing prior to the late 1990s as the web grew.
 This is also a very US-centric view of the world of HCI/IXD and UX.
